

On no account does this letter mean to restrict the free speech of our great nation. Media is one of, if not the most, important deciding factor in America today. As a youth and as a participant of the Model United Nations Program, I feel that free speech should be honored.

However, Sinclair is using this right as a shield to force their opinions on the American public. We should pay special attention to this, especially in this years high stakes election. I live in a key swing state, Ohio, and I feel such a program would disrupt many people's personal opinions.

Furthermore, I feel, as an American, that presenting only one side of an argument is uncouth and should be frowned upon. Sinclair is attempting to use the American Media Outlet as a tool to further their own ambitions. This is clear due to the fact they air this special nights before the election.

I have faith that the FCC will stop this act before it has the chance to destroy the credibility of America's media. With so many facts being fired in each direction, it is especially important to present unbiased news coverage. Allowing this clearly biased special to air days before the election is an insult to all the people who have helped to build our credible news stations. I greatly admire Helen Thomas and seriously believe that America should return to the days of "Just the Facts News." This may be wishful thinking, however, not allowing this special to air will be taking one step towards the restoration of public faith in America's media. Thank you.
